## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 13 and 14, are rejected under 35 U.S.C. 102(b) as being anticipated by Dillon, USPN 5,727,065.

With regard to claim 13, Dillon discloses a receiver for receiving data (broadcast center 150) over a telecommunications network (column 1 lines 11-14, column 3 lines 42-45) including, means for deriving a first reference value from the received data (engine specific key, column 11 lines 4-6), means for calculating an error check value from the received data (decrypted received checksum, column 12 lines 10-11), means for deriving an authentication value for the received data (decrypted billing information, column 8 lines 26-35), means for calculating a second reference value (broadcast center generated checksum, column 10 line 66-column 11 line 6) at least partly based on the authentication value (decrypted billing information) and the first reference value (engine specific key), and means for comparing the second reference value with the error check value determining whether the received data has changed during transmission (column 12 lines 5-14).

With regard to claim 14, Dillon discloses performing a DES function (column 10 line 54-column 11 line 6), which contains Xor functions.
